Memory Study

*Participants Needed*

$20 or 2 SONA Credits

This memory study involves studying a series of words and sentences before performing a memory task. The study runs 90 minutes or less and will take place while seated at a computer.

If you are between the ages of 18 and 40 and would like to participate or have any questions about the study, please sign up for “Memory for multiple information in an imaginary scene” on SONA or email us at vtmemorylab@gmail.com with a subject line of “VT Memory.”

This study is being conducted through the Virginia Tech Psychology Department and has been approved by the Virginia Tech Institutional Review Board (IRB 11-505).
